SUMMARY
Results-oriented Data Scientist with strong background in statistical modeling, machine learning, and predictive analytics. Skilled in translating complex data into actionable business strategies.

CORE COMPETENCIES
- Skills: Python, R, SQL, Machine Learning, Data Analysis, Data Visualization, Scikit-Learn, Pandas, NumPy, Tableau
- Databases & Cloud: MySQL, PostgreSQL, Snowflake, AWS, Git, Agile, Problem Solving

PROFESSIONAL EXPERIENCE
Data Scientist | Vantage Analytics Group | Seattle, WA
Jan 2022 - Present
- Built customer churn prediction models using Scikit-Learn and Random Forests, improving retention by 18%.
- Designed automated ETL pipelines in Python and SQL feeding directly into Tableau executive dashboards.
- Applied exploratory data analysis across multiple gigabytes of behavioral datasets in Snowflake.

Junior Data Analyst | Apex Insights | Seattle, WA
Jun 2020 - Dec 2021
- Performed statistical regression analyses and A/B testing evaluation for e-commerce products.
- Created automated MySQL reporting scripts and streamlined weekly metric updates.

EDUCATION
Bachelor of Science in Mathematics & Statistics
University of Washington | 2016 - 2020 | GPA: 3.75 / 4.0

PROJECTS
- ChurnPredictor: Machine learning pipeline predicting customer attrition with Scikit-Learn and Pandas.
- MarketBasket: Association rule mining system analyzing consumer purchase transactions.

CERTIFICATIONS
- TensorFlow Developer Certificate
